MURILO DIAS DE ALMEIDA

JUNDIAÍ, SÃO PAULO - BRAZIL - +55 (11) 96647-9339 - MURILO.AD@OUTLOOK.COM

I'm a software developer with over 5 years of experience developing and implementing .NET applications and modern web apps. I believe that through Scrum we are able to deliver a solution valuable to the client rather than lines of code, which, pretty much anyone can write. The real deal is being able to deliver something that they can relate to, not just software. Being passionate about what I do makes me pursuit excellence on everything I develop.

EXPERIENCE

SOFTWARE DEVELOPER

ACTMINDS, INC

SEPTEMBER 2016 - PRESENT

Here is where the fun began; I started working with Agile/Scrum on a US based client, using GIT, SPAs with Angular, .NET APIs, .NET Core, EF, Nhibernate, NodeJS, NServiceBus, Ruby/Rake, CI/CD, Jenkins. Had the experience of travelling to US in order to work along with client, this helped me to understand more about scrum and agile teams, it's a rollercoaster but it's where I grew up the most, personally and professionally. It has been a great experience.

SOFTWARE DEVELOPER

GRUPO VICERI

JULY 2015 - SEPTEMBER 2016

I Kept working, mostly, with web apps, it had a few projects with WebForms, Java and ASP, yes, that old one, but I also had the chance to start a new project from the ground zero, a big project using MVC, APIs, Gulp/Grunt, NPM, CI/CD, Micro-ORM that we created.

SOFTWARE DEVELOPER
GOLDSOFT
SEPTEMBER 2014 - JUNE 2015

Here I focused on web applications more, I worked with Oracle and MySQL databases, ASP.NET MVC/API, jQuery, Ajax and kept using TFS as main source control tool.

SOFTWARE DEVELOPER
FINAMAX CFI
FEBRUARY 2013 - MAY 2014

It's where I started my it career, fresh out of tech school, didn't have actual experience with software development, I started working with ASP.NET Web Forms and Windows Forms, both using SQL Server, migrating Delphi based applications to C#. Also had a first contact with MVC, Entity Framework and NHibernate and TFS as source control tool.

ACADEMIC FORMATION

FACULDADE PROF. LUIZ ROSA (ANHANGUERA)
SYSTEMS ANALYSIS AND DEVELOPMENT COURSE

2012 - 2014

ESCOLA TÉCNICA VASCO ANTÔNIO VENCHIARUTTI
IT TECHNICAL SCHOOL

2007 - 2008

SKILLS

PROGRAMMING LANGUAGES & TOOLS

HTML5

CSS3

GIT/TFS

Angularjs

Angular

Javascript

Typescript

SQL Server

ORM (Entity Framework / Dapper)

Docker

Java

CSharp (C#)

Ruby

Xamarin

CI/CD (Jenkins, VSTS)

REST / SOAP

Agile / Scrum

SOLID / KISS

PROFICIENCY LEVELS

Beginner	Proficient	Advanced	Master	Expert

CERTIFICATIONS & COURSES

CERTIFICATIONS

MCSA - Microsoft® Certified Solutions Associate: Web Applications

MCP - Microsoft® Certified Professional

COURSES

- ASP.NET Core + Angular 2
- ASP.NET MVC 5 - Enterprise Applications
- Modern Apps and Architectures. (MVC5, DDD, EF6, IoC, Domain Events)
- edX Azure Skills Toolkit

INTERESTS

Let's make this quick; I'm 28, married, no kids, two cats. I like to; read, watch movies, gaming, to travel, going out with friends, nice meals, going to concerts, listen to music and a lot of other things that only I enjoy, or not, I don't know.

Being a developer is something that I love, even though it took me years to finally find myself doing this. I tried a few other things before, didn't went well, I always felt that something was missing, not anymore. It's like that saying; Do what you want and you... no wait, it was... Love what you do and... it's not that either, nevermind, I don't remember, but it's awesome!

Some say I'm grumpy in a funny way. Most of my friends like me, I say "most", because you never know, and I have just a few, so, this might mean something. ;)
